AT-RM GmbH
Your Partner for Authorisation Safety and Validation

1

Company / Société

Regardless of the nature of industrial installations, machinery, or vehicles, the demand for functionally secure solutions continues to rise.

Functional safety is a key quality criterion: it not only helps prevent hazards and reduce manufacturers' liability risks but also minimizes unexpected downtimes for users. This results in increased availability, optimized productivity, and improved operational quality.

AT-RM GmbH stands out for its deep expertise in the field of railway vehicles and machinery. We have in-depth knowledge of all safety, validation, and certification requirements for railway vehicles.

This expertise is built on many years of professional experience gained by our team, both nationally and internationally. Our practical know-how, enriched by extensive hands-on experience, is one of our key strengths.

In addition to our technical expertise, we have developed an international network of partners, enabling us to successfully carry out projects involving testing and validation through strategic cooperation agreements.

The company Alstom, one of the world's leading providers of railway technology, trusts in our quality.
Join us and benefit from our first-class service.

Alstom, leader mondial des technologies ferroviaires, fait confiance à notre expertise et à la qualité de nos services.
Rejoignez-nous et bénéficiez d'un service d'excellence.
